

# Legendary Reliability Since 1927

## About Us

The legacy of PETOL® began in 1927 in Houston, Texas as GEARENCH, a manufacturing company established by J.A. Peterson and C.E. Olsen from whose surnames came the name PETOL. In 1978, Chester Posey purchased GEARENCH which had facilities in Houston and Clifton, Texas. By 1981 the remaining Houston operations were moved to the central Texas town of Clifton and since that time PETOL has grown into an 87,000+ sq. ft. production, warehouse and office facility that produces products distributed domestically and internationally.

## Quality Assurance

PETOL is committed to meeting customer and regulatory requirements, and increasing customer satisfaction through continual improvement of its products, services, and the quality management system.

Certifications:

- ISO 9001:2015 Quality System Compliant
- API Q1 10th Edition Quality System Compliant
- Licensed API 8C PSL2 Manufacturing Facility

## Industries Served

Since the first patented product, the GEARENCH - a hand tool for use on small diameter pipe - PETOL has developed or acquired over fifty product lines used globally across a wide range of vital industries including:

- Oil/Gas Drilling & Exploration
- Oil/Gas Completion & Production
- Water Well Drilling & Completion
- Trenchless Technology Drilling
- MWD (Measurement While Drilling)
- General Industrial Markets
- Power Generation
- Mining & Blasthole
- Refining & Petrochemical
- Pipeline Construction & Repair
- Marine & Ship Building

## Mission

PETOL manufactures and distributes an ever-increasing number of high quality, safe, and effective products by utilizing the latest innovations in applied engineering, manufacturing processes and quality assurance. Our goal is to produce products that meet or exceed customer expectations, applicable statutory, and regulatory requirements. In pursuit of our goal, PETOL will remain fundamentally committed to developing and implementing policies and procedures that support and encourage safety, honesty, integrity, and respect for all employees and our environment.

## Additional Services

For 40 years, PETOL has produced herringbone gears to service the oil fields and industrial machinery. In 2014 a significant expansion was begun to improve the capacity, capabilities and quality of gear production. This addition positioned PETOL to offer specialized Custom Metrology and Reverse Engineering services for simple or complex parts with a wide range of size capacity.

## New Products / Acquisitions

PETOL is continually adding new products to help solve problems in the industries we serve. PETOL continuously researches and develops new tools, by working with customers to understand what will make their jobs safer and more efficient. We greatly value customer feedback and listen to what they need to make their jobs better. As potential new products arise, systematic efforts are made to market each in a timely a manner.
